

Obeya Builder training

The Obeya builder training is an in-depth and practical program on the technicalities of building an Obeya room. The training teaches you how to design a (digital) obeya room, how to deal with information and data and how to visualize information in aid of a collective learning process. The Obeya Fundamentals level is recommended for people new to Obeya.

Subjects

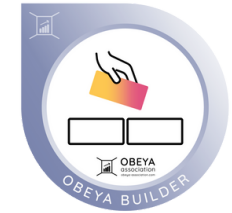

A brief overview of the programme can be found below:

- **Obeya Host / Builder role collaboration**
- **Structuring Obeya rooms**
- **Information categorization techniques**
- **Visual Management practices**
- **Data collection**
- **Developing Obeya maturity**

Duration and number of participants

- **Participants: 6 to 12 participants**
- **Duration: 2 days**
- **Certification: Obeya Builder by the Obeya Association**

STRUCTURE INFORMATION INTO A DYNAMIC AND
CONNECTED PLAN TOWARDS LONG TERM VALUE

Training structure

DAY 1
